

Dear Sir,

I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food, to ask that the agency's current policies be changed, and to support all the points in docket # OOP-1211/CPI, specifically:

- All GE foods should be labeled so I am informed and have a choice.
- GE foods should not be assumed to be "generally recognized & safe" and should have mandatory pre-market safety testing.
- There should be a moratorium on 'GE foods and crops until long term studies show they are safe for human health and the environment.

Additional Personal Comments:

There is no option to go back once GE foods & crops have filled the market. Please test all GE crops and label everything for consumers.
